

Lawn dressing

Product Overview

Ingredients

Specially processed green compost meeting UK ABPR (UK Hygiene Regulations) and PAS100:2007 plus Forestry Stewardship Council standards

Rich in humus and natural organic nutrients

Recommended Uses

To repair and revive the lawn

Key Benefits

Repairs and revives lawns

Reduces moss

Enhances drought tolerance

Includes natural nutrients for prolonged green-up

Advice:

As with all gardening activities, wash hands after handling.

We recommend gloves are worn at all times

Footnotes:

¹ This should not be compared with the pH of peat products (the optimal pH of peat products is much lower than for soil and composted materials).

² 'CAT' = aqueous solution of calcium chloride + DTPA (chelating agent) - an extractant originally developed for soils and now specified in UK and European standards for composted materials (eg PAS100) because it is more appropriate for most nutrients than the water-extraction method originally developed for peat products only.
